

Wednesday 5.15 pm
Center for Optical
Quantum Technologies
Seminar room

SFB/ZOQ Colloquium

Winter term 2013-2014

- ❖ 16 October, 4.00 pm! – Anne L’Huillier, Lund University „From extreme nonlinear optics to ultrafast atomic physics“
- ❖ 23 October – Dmitri Basov, University of California „Nanoplasmonic phenomena in graphene“
- ❖ 20 November – Klaus Mølmer, Aarhus University „Hybrid quantum computers with superconductors and spin ensembles“
- ❖ 4 December – Robert Schoenlein, Lawrence Berkeley National Laboratory „Dynamics of electronic ordering in transition-metal oxides via time-resolved resonant soft x-ray scattering“
- ❖ 15 January – Friedrich Reinert, University of Würzburg „How correlations enter the electronic properties of materials“
- ❖ 22 January – Linda Young, Argonne National Laboratory „Toward precision measurements in structural dynamics“
- ❖ 29 January – Cheng Chin, University of Chicago „N.N.“

Universität Hamburg, Luruper Chaussee 149, 22761 Hamburg
